

IRB APPLICATION PROCESS

What is the role of IRB?

To protect the rights and welfare of human participants

1 - InfoEd

Web-based electronic system for IRB submissions and the review process

2 - Student Registration

Students do not automatically have access to InfoEd. Students can gain access by completing the form on the WCU Research Compliance website.

3 - Required Human Subjects Training

Researchers are responsible for including certification of human subjects training with each submission to the IRB.

4 - How to Submit a Project

For all initial submissions, researchers must login to InfoEd and submit a Request for Initial Review of Research. This is an eForm and may be found in the Compliance Module of the software.

5 - Post-Approval Project Functions

All post-approval functions on a project must now be completed in InfoEd through the use of eForms (e.g., protocol modification).
